- (iii) Identified employees who were granted option, during any one year equal to or exceeding 1% of the issued capital (excluding outstanding warrants and conversions) of the company at the time of grant. None

G. Method and Assumptions used to estimate the fair value of options granted during the year:

The Securities Exchange Board of India (SEBI) has prescribed two methods to account for stock grants; (i) the intrinsic value method; (ii) the fair value method. The Bank adopts the intrinsic value method to account for the stock options it grants to the employees. Intrinsic value is the amount by which the quoted market price of the underlying share exceeds the exercise price of the option: The fair value of the options is estimated on the date of grant using Black Scholes options pricing model with following inputs/assumptions:

Tranches	Particulars
Exercise Price per share (Rs)	
Weighted Average Share Price per share (Rs)	
Expected Volatility (%)	
Historical Volatility (%)	
Life of the options granted (Vesting and Exercise period in years)	
Average Risk Free Interest rate (%)	
Expected Dividend Yield (%)	.No Options Granted during the Year
Price of underlying share in the market at the time of grant of option (Rs.)	
The method used and the assumptions made to incorporate the effects of expected	
early exercise.	
How expected volatility was determined, including an explanation of the extent to	
which expected volatility was based on historical volatility.	
Whether and how any other features of the option grant were incorporated into the	
measurement of fair value, such as a market condition.	

H. Assumptions

Stock Price: Closing price on National Stock Exchange on the previous date of NRC meeting.

Volatility: The historical volatility over the expected life has been considered to calculate the fair value.

Risk-free Rate of Return: The risk-free interest rate being considered for the calculation is the interest rate applicable for a maturity equal to the expected life of the options based on the FIMMDA par yield curve for GovernmentSecurities.

Exercise Price: Exercise Price of each specific grant has been considered.

Time to Maturity: Time to Maturity / Expected Life of options is the period for which the Bank expects the options to be live.

Expected Divided Yield: Expected dividend yield has been calculated as dividend yields for the financialyear preceding the date of the grant.
